

Build the foundation for autonomous finance with SAP Cloud ERP

Take a look at how companies are modernizing finance and putting AI to work across their operations.

CFOs must reshape finance and prepare for continuous AI-driven operations

Today's finance leaders face the need to move faster, automate more, and adopt AI responsibly with trusted data and governance.

At the same time, challenges keep growing.

Disconnected data across the business

Too many manual, siloed finance processes

Limited real-time insights or AI-powered analytics

SAP Cloud ERP puts autonomous finance at the heart of operations—helping companies:

Simplify processes to improve control and governance

Connect trusted data for clearer, real-time visibility and forecasting

Use AI to automate work, move faster, and stay agile

The real-world impact of a modern finance foundation

See how companies are modernizing finance to ramp up smarter operations with AI built in.

1. Speed Accelerate decision-making with streamlined, AI-ready processes

Legacy systems slowed **CTT**'s ability to react quickly. By moving to RISE with SAP and automating billing, the company slashed invoice processing from 10 hours to 2 and shortened monthly close by a day—giving teams the speed and agility they need to stay competitive.

“Thanks to RISE with SAP S/4HANA Cloud Private Edition, many of our business processes are now standardized, creating synergies and increasing efficiency. We no longer depend on custom code to add new features and functionalities. This enables us to innovate and respond to requests from the business faster and more cost-effectively.”

Nuno Carreira Silva
IT Corporate Director, CTT Correios de Portugal S.A.

2. Stability Drive stable, scalable AI adoption to support continuous growth

Amadeus needed rock solid stability to support 150M+ daily transactions while moving its systems to the cloud. With RISE with SAP and SAP S/4HANA Cloud Private Edition, the company kept operations steady through the transition and built a dependable foundation to grow.

“RISE with SAP helped the magic happen in our finance transformation. We were able to maintain stability during this crucial project while moving our systems to the cloud and managing change with a positive momentum.”

Stephan Ortner
Associate Director for Business Application Platforms, Amadeus IT Group S.A.

3. Transparency Enable trusted insights, governance, and more informed decision-making

With a focus on operational excellence, energy efficiency, and reducing its carbon footprint, **HELLENiQ ENERGY** embarked on a large-scale digital transformation centered on SAP S/4HANA Cloud Private Edition through the RISE with SAP offering.

“Seamlessly integrated with SAP S/4HANA Cloud Private Edition, the unified platform connects applications, processes, and data, unlocking dynamic workflows and fostering greater transparency across the organization.”

Dimitris Routsis
Head of ERP Services, HELLENiQ ENERGY Holdings S.A.
