EPICOR

Cognitive ERP

*Unlocking the power
of the connected enterprise
with AI-infused ERP -
powered by Epicor Kinetic*

WHAT IS EPICOR KINETIC?

Global Cloud ERP Built for Manufacturers

Kinetic is a global cloud ERP solution designed for and with manufacturers, helping them maximize profitability with real-time business intelligence and built-in collaboration tools. Powered by the industry expertise of Epicor, Kinetic has the functionality to run a modern, future-ready business poised to capitalize on data, transform digitally, and innovate without limits.

- Specialized for discrete, make-to-order manufacturing
- Cloud-focused solution with flexibility for on-premises and hybrid deployments
- End-to-end capabilities and security from a single platform and vendor

Drive Greater Business Efficiency With an Empowered Workforce

With greater personalisation, flexibility and insights, Kinetic helps your workforce work smarter, safer, and better.

- Aggregate, transform, and apply data for improved operational performance
- Drive adoption and new levels of innovation with easy-to-use systems and digitally connected teams
- Predict disruption and manage it with people-centric AI from cognitive ERP

Grow Revenue With Resilient, Sustainable Supply Chains

Kinetic helps you deliver on customer expectations with the visibility you need to support your supply chain execution needs.

- Manage demand against supply with advanced tools for forecasting, MRP, Advanced Planning and Scheduling, and sourcing
- Deliver on expectations across the extended global enterprise with site-to-site visibility and more sustainable movement of goods
- Ensure operational performance metrics with financial reporting and analytics at the heart of ERP
- Leverage your customer digital experience with configurable CPQ and eCommerce

Improve Productivity at Reduced Cost With Smart Manufacturing

Listening to the signals of your plant floor with data collection and IoT-enabled MES provides needed oversight into equipment, efficiency, and quality metrics. Enable your production team with Kinetic to deliver results across your new product design and plant floor operations.

- Leverage sustainable engineering and PLM solutions to meet your needs for rapid innovation and prototyping
- Adapt with AI-infused insights and digital twin analysis that helps you grow, scale, and stay one step ahead
- Continuously improve operations with automation for greater business productivity

EVERY DAY IS EASIER WITH
EPICOR

 **Industrial Machinery**

 **Rubber & Plastics**

 **Engineering Services**

 **Metal Fabrication**

 **Specialised Vehicles**

 **Medical Devices**

 **Paper & Packaging**

 **Electronics & High Tech**

 **Aerospace & Defence**

Capabilities

Financials

Finance experts and leaders can leverage the power of digitization, automation, customization, and Machine Learning (ML) to focus on what really matters: strong cost control, essential accounting, reporting, budget planning, and global-, industry-, or location-specific capabilities.

Business Intelligence and Analytics

Build a data-driven business with business intelligence and in-depth analytics. Attractive, easy-to-read dashboards and reports show what's happening across your entire enterprise.

Supply Chain Management

You want better control and visibility into mission-critical supply chain processes. Kinetic keeps it simple, freeing up resources to enhance the customer experience and stay in front of the competition.

Planning and Scheduling

Increase throughput with complex planning and scheduling needs for businesses of all sizes. Our solutions bring greater operational visibility, whether you run a single site or a global enterprise.

Production Management

Build new levels of productivity with efficient production control capabilities and Smart Factory innovation. Reduce costs, streamline operations, and deliver consistent quality every day.

Services and Assets

Optimize resource management and keep customers satisfied. Epicor service management software controls the costs of meeting customer demands, clearing a path to increased profits.

Internet of Things

Epicor IoT integrates smart sensors with ERP, providing real-time data for monitoring, preemptive maintenance, and process optimization to enhance efficiency, reduce downtime, and drive data-driven decision-making.

Risk and Compliance

Control risk and drive performance. Enterprise risk management and compliance is ever-changing. Epicor designs governance risk and compliance (GRC) solutions to meet published international standards and industry best practices.

Omnichannel Sales

Focusing on your customers with digital technologies that offer greater responsiveness, self-service, and seamless digital experiences helps increase overall revenue and gives you a competitive edge.

Customer Relationship Management

Customer Relationship Management (CRM) controls every aspect of a company's interaction with its customers and prospects and is enabled with mobile capabilities. CRM helps provide a 360-degree view of the complete customer relationship.

Product Management

Optimize your product lifecycle management processes to boost staff efficiency, improve quality, reduce time-to-market, cut costs, and maximize profits.

Project Management

Get detailed estimation, planning, scheduling, costing, and supply chain logistics for complete control and analysis of any project. Kinetic supports even your most complex multilevel projects, costing rules or billing methods.

Global Business Management

Transact between multiple systems and entities, including inter-company orders, transfers, and shipments. Our scalable solution supports multiple companies, currencies, and languages, and offers country-specific compliance packs.

Cloud Business Platform

Adapt to changes with confidence knowing your critical business systems are secure and up-to-date with the latest industry innovations. Plus, empower your team with a simple, browser-based experience with built-in guidance.

Electronic Reports

Get data out of your ERP and send it to auditors, investors, advisory companies or to any third parties. Generate XML or other file formats, small or large, frequent transaction-based or annual audit files..

Advanced Projects by Precise

Gain granular financial insight into manufacturing projects for informed decision-making, lower operational costs, and boost profitability with Epicor Advanced Project Accounting.

Advanced Requisition Management

Centralize and automate procurement for production facilities, ensure compliance, reduce manufacturing costs, drive budget efficiency, and increase expenditure visibility in the organization.

Empowering the Make, Move, Sell Economies to Extract Value from AI

At Epicor, our 50+ years of experience combined with the latest AI technology and our industry data structure gives your company the Insight Advantage.

Epicor AI-infused ERP helps reduce the friction that occurs today when accessing systems of records like machine data or databases from other applications. By reducing this friction, you experience faster onboarding and higher accuracy of data retrieval. Epicor automates the connection between humans and machines, so the human worker can augment their work with machine-generated data while also directing the machine in the next step of a process. This optimizes human interactions with machines by facilitating the adaptation of systems to people-not the other way around. Epicor will bring AI-powered assistance to you and your workforce, empowering you to extract crucial insights while leveraging the power of the machine to better serve your team, your customers, and your partners.

every day is easier with

Epicor Prism

Epicor Prism delivers innovation with intent through an unparalleled integration of vertical AI agents, industry-focused ERP, and industry data structures. This powerful combination supercharges your work by reducing operational friction, embedding AI directly into your workflows, and maximizing business value.

www.epicor.com/prism

Smarter, Faster Workflows

Epicor Prism transforms how makers, movers, and sellers by combining natural language with industry-focused AI.

Simply ask Prism a question, describe a task, or upload context (like a screenshot), and Prism's AI agents retrieve real-time answers, perform actions, and even suggest next steps in easy-to-understand language.

Whether you want to streamline logistics, optimize production, or improve decision-making, Prism helps you get more done with less effort. Because it's cloud-only, you'll always have access to the latest AI innovations without upgrades or compability hassels.

- 1 Multi-Modal. Q&A**
Ask questions with text or screenshots to get instant, accurate answers from your ERP data.
- 2 Knowledge Agent**
Get help instantly from context-aware AI that surfaces the right articles or guidance from your own ERP or ECM documents.
- 3 Automation & Efficiency**
Filter, summarize, and analyze ERP data in natural language to eliminate manual steps and accelerate decision-making.
- 4 Insight Advantage**
From identifying bottlenecks to surfacing customer trends, Prism helps you stay one step ahead by turning your ERP into a system of insights and action.
